

FROM BEING HEARD TO CREATING CHANGE

Lived experiences heard: real voices, real change.

World Mental
Health Day 2026

*Real voices.
Real experiences.
Real change.*

1. Speak up

- Thoughts kept inside
- Fear of being judged
- Hard to know where to start

Try this: Start small with someone you trust: “I’ve been feeling...”

2. Listen first

- Quick advice, little listening
- Interrupting
- Judging too fast

Try this: Give your full attention and hear people out before you judge.

**Your voice can start a conversation.
Your action can create change.**

3. Act together

- Feeling alone with it
- Stigma around asking for help
- Not knowing what to do

Try this: Check in on a friend, offer peer support, challenge stigma.

4. Create change

- Less stigma
- Better support
- A seat at the table

Together: Small actions add up to a better community.

Speak → Listen → Act → Create change
